

STUDENT AUTOMOBILE USE

Students are allowed to drive their vehicles to and from school. Students should park in the designated parking areas on campus when available. Students that park in a manner that hampers the regular school day in any way are subject to having their cars towed. Students should keep driveways clear and park in an orderly fashion.

A student may not drive their vehicle to an extra-curricular activity that they are participating in which has been provided transportation. The student, with approval from the bus driver and coach or advisor in charge, may drive to a designated area on the route and be picked up so it is more convenient for them to get home after the activity.
