

ACCESS TO BUILDINGS (Trespass on School Property)

Measures shall be taken by the Superintendent to secure buildings and grounds against trespass.

The Director of Buildings and Grounds will implement and monitor an adequate key control system which limits access to authorized personnel and safeguards against keys being obtained by unauthorized persons. Determination of who qualifies as authorized personnel is at the discretion of the Director of Buildings and Grounds.

The Board wishes the public to make use of the school system's recreational facilities during daytime hours when those facilities are available for public use. However, when a school facility is closed for the night, school grounds and roadways are to be considered closed to the public.

School personnel have the Board's authority to ask any persons found on school property after hours to leave, and to inform the police should the person fail to do so.

The Board shall resort to its rights to enforce restrictions on a person or activity against trespassing.

Adopted: July 11, 2017
