

MCJHS/MCHS Operations Board Report

September 16, 2019

Technology

It has been a busy month for technology with issuing over 700 Chromebooks to the students and then keeping them going with little issues here and there. We are also spending time getting to know a program that we are piloting that allows the teachers to be able lock the devices to get the students attention, kick them off of certain sites, and also to monitor what the students are doing on the school issued Chromebook. This program has filtering capabilities that block the students from reaching certain sites at school and at home.

Fall Sports

The fall sports season is in full swing and there is a lot of behind the scenes work that needs to be completed before and after each game and practice to make sure everything is ready. It is a rather large undertaking that may go unnoticed and just want to take this opportunity to say that their work is greatly appreciated.

Emergency Drills

The Junior/Senior High School have been conducting the required emergency drills and making improvements as we go. As of the board meeting, we will have completed two of our three fire drills and our law enforcement drill with the cooperation of local law enforcement. The plans are in good shape, but we continue to look for improvements to add to student and staff safety.
