Building and Grounds Management

The Board recognizes the tremendous investment in the District's facilities, buildings, grounds and equipment. It is acknowledged that normal deterioration from natural elements and ordinary use will occur. However, with proper care and attention the rate of deterioration can be reduced and repair and replacement costs held within reasonable limits. Therefore, the Board believes that a proper program of preventive maintenance is a requirement for efficient and economic building operation.

The District shall survey and assess the exposure of friable asbestos in all buildings. A written report shall be filed with appropriate state agencies, and will be available for public review in the Superintendent's office. The report shall be filed as required by law. The District shall take all steps necessary to comply with the Asbestos Hazard Emergency Response Act, as described in regulations of the Environmental Protection Agency.
