School Accountability

According to the Illinois General Assembly, the primary purpose of schooling is the transmission of knowledge and culture through which students learn in areas necessary to their continuing development and entry into the world of work. To fulfill that purpose, the Illinois State Board of Education prepared *State Goals for Learning* with accompanying *Illinois Learning Standards*.

The School Board gives priority in the allocation of resources, including funds, time, personnel, and facilities, to fulfilling this purpose.

Quality Assurance

The Board continuously monitors student achievement and the quality of the District's work. The Superintendent shall supervise the following quality assurance components, in accordance with State law and Illinois State Board of Education (ISBE) rules, and continuously keep the Board informed:

1. Prepare each school's annual recognition application and quality assurance appraisal, whether internal or external, to assess each school's continuous school improvement.
2. Continuously assess the District's and each school's overall performance in terms of both academic success and equity. This includes, without limitation, a thorough analysis of ISBE's balanced accountability measure and each school's *Multiple Measure Index* and corresponding *Annual Measurable Objective* provided by ISBE.
3. If applicable, develop District and School Improvement Plans, present them for Board approval, and supervise their implementation.
4. Prepare a school report card, present it at a regular Board meeting, and disseminate it as provided in State law.
5. In accordance with Sec. 2-3.153 of the School Code, administer at least biennially a survey of learning conditions on the instructional environment within the school to, at minimum, students in grades 6 through 12 and teachers.

STUDENT WELLNESS

Nippersink District 2 promotes healthy schools by supporting wellness, good nutrition, and regular physical activity as a part of the total learning environment. The District supports a healthy environment where children learn and participate in positive dietary and lifestyle practices. By facilitating learning through the support and promotion of good nutrition and physical activity, schools contribute to the basic health status of children. Improved health optimizes student performance potential and ensures that no child is left behind.

INTENT

The purpose of this policy is to ensure a total school environment that promotes and supports student health and wellness, helps to reduce childhood obesity and meets the requirements of the Child Nutrition and WIC Reauthorization Act of 2004 and the Illinois School Code, including, without limitation, goals for nutrition education, physical activity and other school-based activities designed to promote student wellness; nutrition guidelines for all foods available during the school day; a plan for measuring implementation including designating one or more persons charged with operational responsibility; and involving parents, students, school food service providers, the school board, school administrators, and the public in developing this policy.

RATIONALE

A disturbing number of children are inactive and do not eat well. The result is an alarming 16 percent of children and adolescents are overweight – a three fold increase since 1980. Congress passed the Child Nutrition and WIC Reauthorization Act of 2004 on June 30, 2004. Recognizing the role schools can play in health promotion; this law requires local education agencies participating in a program authorized by the National School Lunch Act or the Child Nutrition Act of 1966 to develop a local wellness policy. The objectives of the wellness policy are to improve the school nutrition environment, promote student health and reduce childhood obesity. In addition, Public Act 094-0199 amends the Illinois School code, requiring the Illinois State Board of Education to establish a state goal that all districts have a wellness policy.

The link between nutrition and learning is well documented. Healthy eating patterns are essential for students to achieve their full academic potential, full physical and mental growth and lifelong health and well-being. Healthy eating is demonstrably linked to reduced risk for mortality and development of many chronic diseases. Schools and school communities have a responsibility to help students acquire the knowledge and skills necessary to establish and maintain lifelong healthy eating patterns. Well-planned and well-implemented wellness programs have been shown to positively influence children's health.

Schools also have a responsibility to help students establish and maintain lifelong habits of being physically active. According to the U.S. Surgeon General, regular physical activity is one of the most important things people can do to maintain and improve their physical health, mental health, and overall well-being. Regular physical activity reduces the risk of premature death in general and of heart disease, high blood pressure, colon cancer, and diabetes.

GOALS:

- A. Provide a comprehensive learning environment for developing and practicing lifelong wellness behaviors.

The entire school environment, not just the classroom, shall be aligned with healthy school goals to positively influence a student's understanding, beliefs, and habits, as they relate to good nutrition and regular physical activity. A healthy school environment should not be dependent on revenue from high-fat, low nutrient foods to support school programs.

Support and promote proper dietary habits contributing to students' health status and academic performance.

All foods available on school grounds and at school-sponsored activities during the instructional day should meet or exceed the District Nutrition Standards. Emphasis should be placed on foods that are nutrient dense per calorie. Foods should be served with consideration toward variety, appeal, taste, safety, and packaging to ensure high quality meals.

- B. Increase the amount of time students are engaged in physical activity.

A quality physical education program is an essential component for all students to learn about and participate in physical activity. Physical activity should be included in a school's daily education program from grades pre-K through 12. Physical activity should include regular instructional physical education, co-curricular activities and recess. Substituting any one of these components for the others is not appropriate.

- C. Nippersink District 2 is committed to improving academic performance in high-risk groups so that no child is left behind.

Educators, administrators, parents, health practitioners, and communities must all acknowledge the critical role student health plays in academic stamina and performance and adapt the school environment to ensure students' basic nourishment and activity needs are met. Research highlighting the positive relationship between good nutrition, physical activity, and the capacity of students to develop and learn should be highlighted to ensure widespread understanding of the benefits to healthy school environments. The diversity of the student population (e.g., economic, religious, minority, cultural, and medical) should be considered at all times to ensure that all student needs are being met so that no child is left behind.

All field trips must have the Superintendent or designee's prior approval, except that field trips beyond a 200-mile radius of the school or extending overnight must have the prior approval of the Board. ¹ The provisions in this policy are entirely at a board's discretion. The following is an optional section for including class trips in this policy. If the option is included, add this subsection to the bottom of the policy and add "and Recreational Class Trips" to the policy's title.

Grading and Promotion

The Superintendent shall establish a system of grading and reporting academic achievement to students and their parents/guardians. The system shall also determine when promotion and graduation requirements are met. - An inappropriate grading system used to determine the grade, or
- An inappropriate grade based on an appropriate grading system.
