Marysville School Board Adopts Capital Levy Resolution

Msvl. WA - The Marysville School District Board of Directors took action at their regular session meeting on October 21 to adopt Resolution No. 2020-03, concerning a proposition to replace elementary schools and improve student safety. This proposition would authorize the district to levy the following excess taxes, on all taxable property within the district, to construct new elementary schools to replace Liberty and Cascade Elementary and make district-wide safety, security and other capital improvements.

Successful passage of this Capital Levy measure on February 11, 2020, would rebuild schools with the greatest facility needs, Liberty Elementary and Cascade Elementary. Each building would be replaced with efficient buildings that maximize space for learning and improve student safety. The outdated conditions and systems in these schools make it fiscally responsible to replace the buildings rather than invest in major improvements and upgrades.

The measure would also enhance safety and security for students and schools throughout the district by improving safety while maintaining welcoming entrances into the schools, including electronic access controls and cameras for safety and security.

The goal of the district through this measure is to jumpstart a cycle of continuous improvement to rebuild facilities with the highest needs, and to continue improving schools across the district in the future.

For more information about the Capital Levy, contact Mike Sullivan, Executive Director of Finance and Operations, mike_sullivan@msd25.org, 360-965-0094, or visit the Marysville School District website at <https://www.msd25.org/capital-levy-2020>
