

Feeding myself is a great fine motor and personal-social skill I have.

start early

Parents/guardians, there is no one your children would rather learn from than you.

Fort Scott Early Childhood Program

*Serving families with children
prenatal – 6 years*

Fort Scott Early Childhood Program

*...starting with the
very youngest*

Is my child typically developing?
How can I promote healthy development in my little one?
Will my child be ready for preschool when the time comes?

Fort Scott Early Childhood Program can help answer these questions while providing useful tools and creative avenues to help you build a strong developmental and educational foundation for your child. We know that you are your child's first and most influential teacher; therefore, no one holds greater potential for positive effect in his or her life than you.

As active learners, children often learn best through play...including messy play.

Fort Scott Early Childhood Program is a twice a month home visiting program which provides materials, information and activities to assist you in encouraging growth in all areas of your child's development. Screenings are also conducted to determine your child's level of development that we might provide the most appropriate and effective program for you and your child.

FSECP also holds exciting and educational family socials and trainings, often teaming with other Community partners to provide greater benefit and enjoyment to the families. The program provides a book bag exchange at every home visit.

loads of fun and learning with no charge to the families ever

How can I help prepare my toddler/preschooler for the arrival of our new baby? Does reading to my infant/toddler really help his learning? If you are asking yourself questions like these, you have already started on the path to healthy development for your child.
