Title:

Academic Achievement

St. Croix Central School District is committed to providing each child with instructional methods and learning activities that will allow for intellectual, physical, social and emotional growth. Individual student academic progress will be measured and monitored using objective formative and summative assessments that are intended to measure growth and student achievement. Standards Based Grading is used district-wide with regular formative and periodic summative assessments given to determine individual student academic progress toward learning the standards. Grading period report cards will be used to report individual student progress, however other assessments will be ongoing throughout the school year in order to provide a timely and accurate picture of academic progress for each student.
