

Meal Magic School Lunches

Meal Magic makes lunch time easier for families and for the school. Students put money on their accounts before school, then do not have to worry about losing their money before lunch. Once money is put on the students account, the student gets their lunch and input their student number. No change will be given for cash transactions during the lunch period, but will be credited to the student account.

Where do we find my child's student number? The student number can be referenced on Grade Cards for students in Grades 1-12. ECC families and new families will have their student numbers communicated to them. Students in Grades 3-12 should know their number for input into the meal magic system keypad at the end of the cafeteria line. Data input for Pre-School through Grade 2 lunches will be done for them. Grade 2 students will have the opportunity to input their number after the Christmas break.

***Meal Magic accounts can be accessed online** to check transaction history, check balances, transfer money between student accounts within a family, and to make deposits. (NOTE: If you make a deposit online, there is a charge for this which will be shown at checkout.) Please visit the following website for the online functionality: www.SendMoneyToSchool.com.
