What did we miss? Please submit additional questions using this [form](#). Please provide your contact information if you would like us to follow up with you individually.

Q&A from 4/26/17 Parent Meeting:

- What does internet filtering, safety, etc. look like at home?
 - Our filtering system follows the Chromebook regardless of location. Students will experience the same filtering at home as they do in school.
- Can students use the Chromebook at home without the internet?
 - The Chromebook is an internet based device that does not have a hard drive. While it does need the internet to work at its full potential, students are able to access their files and work offline if the internet is not available. We will educate the students on how to allow this to work.
- Are students able to hook up an external display, mouse, etc. for better ergonomic performance?
 - Yes, students may plug in external devices to their Chromebook. Mice and headphones are welcome at school; external monitors and keyboards may be used at home.
- Will students still use textbooks?
 - We began the process of phasing out textbook adoptions four years ago. Bio 1 and Spanish 1 in 8th grade still have textbooks and 6th grade ELA adopted two years ago. Science will offer an online workbook. Most classrooms that used to offer textbooks may still offer these resources during class as needed.

Q&A from 4/26/17 Parent Meeting:

- Do students have the same email for the duration at CPCSC? And do they use the email to create accounts on web based programs? Will they need another email account?
 - Yes, students utilize their school issued email for their duration at CPCSC. Their email is their student id followed by @cpcsc.k12.in.us (For example: 123456@cpcsc.k12.in.us). Students use this account only and at all times at school, so there is no need for another email account.
- When will students receive their device?
 - All CPMS students will be taught through each class a digital curriculum designed to help them be prepared for this change prior to being issued their Chromebook. The curriculum will cover Google Classroom, Google Drive, Email, Digital Citizenship, Care and Use, CPMS Expectations/Acceptable Use Policy. We anticipate Chromebooks being handed after the first 3-5 days of school.
- What is a benefit for the Chromebooks?
 - Digital Learning allows for whole group participation, even from those students that are shy or reluctant to participate in a large group setting. Digital Learning also allows for more timely and individualized feedback for our students.

Q&A from 4/26/17 Parent Meeting:

- What is the expectation for charging the Chromebook? Will students be disciplined if their Chromebook is not charged?
 - Our expectation is that students are charging their Chromebooks each night. As needs arise, students will be permitted to charge their Chromebooks at school. Chronic occurrences may receive additional support and/or consequences.
- Are students able to access social media sites?
 - At this time, students are not able to access Facebook, Instagram or Twitter using school devices.
