

## Section: Narratives - Needs Assessment

### Introduction

The findings of a recent study showed that there is a significant benefit to students who participate in out-of-school-time (OST) programs. In fact, the Return on Investment of Summer school Programs in Pennsylvania study determined that for every dollar invested in summer school programming for students there was a return of \$6.69 in potential benefits to students, including reduced rates for drop-outs, teen pregnancy, substance abuse, crime and delinquency ([Link PSAYDN.org](https://www.psaydn.org/)).

In accordance with the American Rescue Plan (ARP) Act and Pennsylvania Act 24 of 2021 (Act 24), the Pennsylvania Department of Education (PDE) will award approximately \$50,000,000 or one percent (1%) of Pennsylvania's ARP Elementary and Secondary School Education Relief (ESSER) State Reserve funds to support school districts, charter schools and cyber charter schools (collectively, LEAs) in the development and implementation of comprehensive after-school programs to address learning loss in response to the academic, social, emotional and mental health needs of students and subgroups of students impacted by COVID-19 public health emergency that supplement school programs and activities.

Act 24 requires that, when available, existing personnel shall be utilized by school districts, charter schools and cyber charter schools to staff programs and activities established with these grant funds.

Within 90 days of receipt of these allocations, school districts, charter schools and cyber charter schools must submit a three- part plan to PDE, that outlines the proposed use of the grant money, itemized by program and activity. This plan is part of a consolidated application that includes after-school programming, summer programming, and a comprehensive plan to address learning loss. The plan shall include:

- 1) A description of each program and activity
- 2) A narrative outlining the expected benefit of each program and activity
- 3) A budget for each program and activity detailing personnel and operating costs

PDE has developed the Accelerated Learning Toolkit, a significant cadre of resources and trainings, to support LEAs in the development of their plans. The Accelerated Learning Toolkit can be found [Link to Accelerated Learning Toolkit](#).

**Section 1 - Needs Assessment:** In this section, LEAs are asked to describe the impact of the pandemic on their students since March 2020.

### Indicators of Impact

1. Describe how the LEA identified students for inclusion in a summer school program. Include a brief description of the indicators used in the decision-making process.

1. Students who take part in our summer school program will need either remediation in a failed course or a complete original credit retake. In addition, we will be working with our special education population to recoup any instructional losses due to COVID infection or

quarantine. Eligibility to the program will be determined as soon as it becomes apparent a student is going to fail a subject. If a student fails with an average higher than 60% he or she may participate in a course recovery program that includes 45 hours of remedial work with a certified teacher in language arts, math, science, and social studies classes. Students who fail with less than a 60% final average will be eligible to take an original credit course over the course of six weeks. Special education students will also be eligible for these classes if warranted, and will be made whole in terms of missed services due to issues with the pandemic.

## Section: Narratives - Summer School Program Questions

**Summer School Program Questions:** In this section, LEAs are asked to describe the activities they have designed to provide summer school programming for their students.

- Identify the target student-group for the summer school program. Will the focus be on academic growth, social and emotional wellness, or some other factor to support student growth? For each group, provide specific strategies that were used or will be used to identify and measure impacts.

Student Group	Area of Focus	Number of Students Served	Provide specific strategies that were used or will be used to identify and measure impacts
Children from Low-Income Families	Academic Growth	35	Re-teach core concepts. Determine where weaknesses lie, and remediate
Children from Low-Income Families	Academic Growth	20	Re-teach entire course
Children with Disabilities	Some Other Factor	10	Follow individual IEPs

- Describe the evidence-based resources that will be used to support student growth during the summer school program.

3. Teachers will use most of the same resources they use during the course of the school year. Inasmuch as students are reviewing material that they have already been introduced to, teachers can spend time determining where student weaknesses lie and teach accordingly.

- Describe the staff that will provide the summer school program (i.e., internal staff or outside resources).

Number of Staff Members	Internal/Outside Provider	Role
9	Internal Provider	Teacher

**a. The LEA assures it understands it is responsible to offer the work to its internal employees prior to engaging outside entities.**

**b. The LEA assures it understands it is responsible to ensure that all summer school program staff hold the appropriate certifications for the program that is being delivered.**

5. How will the LEA assess the success of the summer school program? Please identify the tool, frequency of use, and expected results.

Tool Used to Evaluate Success	Frequency of Use	Expected Results
Regular assessments in each class resulting in a culminating grade	Throughout duration of program	Student will earn an average above a 70% in order to earn a passing grade for the course.

6. How will the LEA engage families in the summer school program?

6. Our Principals and Guidance Counselors will be monitoring student grades throughout the school year, and will pay special attention to students who may not pass a course. When it becomes apparent a student will not pass, a call will be made to the household to explain our summer programs. We have been able to provide transportation in the past, which is a huge benefit for our families. There is no cost to families, so we should get a pretty robust enrollment.

**Section: Budget - Instruction Expenditures**

Instruction Expenditures

**Budget**

\$19,265.00

**Allocation**

\$19,265.00

---
