Preferred Schematic Report Submission Timeline

Chris LeBlanc noted that several alternatives were updated based on comments received last week. #7 reflected an updated site layout to show another possibility to have play areas closer to the school.

A meeting was scheduled for May 23, 2022 to vote on the preferred schematic.

Community Outreach Update

Matt Sturz said that a community outreach survey had gone out to families and the public. A FAQ document was also being finalized based on questions received from the public. This document will be posted online.

Colliers had met with Eversource to discuss their incentive programs based on how energy efficient the building would be. Heat pump systems would be used to receive their incentives. These incentives are tiered, some are received during construction, others are received later to ensure the continued focus on energy efficiency. Option #7 would be best for operational efficiency followed by #4 then #3. A new building would be able to be built to optimal performance of solar panels

Review of Design Alternatives

Chris Leblanc reviewed the 7 alternatives.

Alternatives #1 and #5 were not selected in the straw poll during last meeting.

Addition and new building alternatives tried to maximize roof space to allow for solar panels.

Easy community access, where the classroom wings could be blocked off, was a favorable feature.

Alternatives #6 and #7 were the most popular in the straw poll.

Alternative #7's parking area was revised to allow for more parking.

Mr. Sturz said that a more compact, multi level building would achieve a higher efficiency since there was less surface area to lose heat. Natural light may be limited during the winter due to the surrounding tree area depending on the location of the building..

MSBA required the district to show where a future expansion could go, but there was no plan to expand. It was noted the same thought was raised for the High School, and their enrollment did not drastically increase.

A new straw poll was conducted.

Mr. Demarco noted that the committee was made up of citizens with certain expertise, on various Town Boards and Committees, and to keep in mind that there were many projects which needed to be funded in Town. It was not possible to have all questions answered at this time. He urged everyone to vote based on what they knew, and what citizens were expressing to them.

Phil Palumbo mentioned that committee members should use the scorecard provided to help them evaluate the alternatives for voting.
