

Public Notice

No maintenance activity occurred involving asbestos during this past year, (2018-2019)

All asbestos that was of immediate concern was removed during the summer of 2003.

The district is required to have a 6-month internal inspection and a 3-year inspection with is contracted out through a local lab.

There are periodic surveillance reports in the District Management Plan that are available for inspection. The plan contains information on inspections, response actions and post-response actions pertaining to maintaining the asbestos containing materials that are in our school.

The management plan is in place to assure that there is a safe environment for the children and adults of the community.

Ryan Wraught
Superintendent
SWCSD Designated Asbestos Representative
