CRACKING THE CODE

Mrs. North welcomed 5th grade students to her classroom this week to learn about coding. Students were introduced to basic programming concepts and learned how "Karel the Dog" could be given a set of instructions to perform simple tasks and to solve problems. The goal is to familiarize students with the world of coding and Computer Science. Whether they develop an interest as a hobby or a career, the possibilities are endless.

REWARDING FRIDAY

Our High School students participated in the 2nd Quarter reward Friday. Students who currently have grades of C and above in their classes and who have no behavior write ups for the quarter are treated to a reward. For the 2nd Quarter, students were treated to breakfast. Teachers and staff prepared various breakfast items as a thank you for their hard work and good behavior.

FOLLOWING DREAMS

The 7th Grade Geography classes were lucky to have Ben Carroll, Mrs. Saddoris's son, come speak to their classes today. He talked to the classes about pursuing a dream and sticking with it to the end. He spoke about and shared pictures of his 5 month adventure walking the Appalachian Trail last year. The class had studied this earlier in the year and really appreciated that he took the time to come to Shiloh to share.

FOOD BASKET PROJECT COMPLETED

Shiloh students delivered completed food baskets around our school community Wednesday. Student Council and FFA currently head this project, which has been a tradition for more than 30 years. Over the years, it has grown into a community project as donations from individuals and businesses have made it possible to serve more families than ever. This year, students were able to deliver 34 food baskets in our community. The groups begin work on this project months before December arrives and the students put in a lot of hours to make sure it is a success. We thank the students and their advisors for all of their hard work.

SPREADING CHEER

Our Wood Shop classes, Ag classes and Art classes all joined together to work on this giant "Merry Christmas" sign. After a few weeks of cutting and painting it is all ready to go. Be sure to keep an eye out for it as you are driving into Newman. Thank you to our students and instructors for taking this project on. It will be sure to spread cheer for years to come.
