

Riverside USD 114 is seeking bids for the following Erate eligible products. These items may be bid separately or as a whole. The bid(s) will be awarded as Erate funded dependent. Bids must be submitted by January 31st, 2020 to 114erate@usd114.org. Vendor must agree to SLD (SPI) invoicing. Vendor is aware of and agrees to follow SLD guidelines on Lowest Comparable Price.

Failure to comply with any of the items above may be grounds for disqualification. Riverside USD 114 reserves the right to accept or reject all bids. Bids will be evaluated by rubric for Erate purposes.

The following equipment is being sought for the district:

A wireless controller(s) to manage the district's wireless network. The device(s) must be able to work in an existing Aruba network, supporting a quantity of 75 access points in a single network covering 4 buildings with 5 network segments. Any single segment contains 1 to 30 access points. The device(s) should have the ability to handle expansion of numbers of access points. The buildings are connected by 1GB fiber. Currently the network supports Aruba models 105, 205, and 305, all instants. The 105s are scheduled to be replaced with on hand non instant 305 models APIN0305 JX936A. The wireless network is supporting an average of 650 clients at any one time.
