It is the beginning of May and you have three weeks of classes prior to your final exams. You will have a 70 minute test in each class that is worth 20% of your semester grade!

What does that mean? This exam can make or break you! Do you have an A in a class and want to keep it? You have to do well (A or high B) on your final! Do you have a B+ in a class and want to raise it to the A range? You have to get an A on your final!

How do you know how well you need to do? Here's an example: Amy has an 89% average for the semester. She wants to know what she needs to earn on the final to get an A or A- for the semester! Let's let x be the grade she needs to earn in order to get an A- (the lowest percentage of that is 90%).

$$89 \cdot 8 + 2x = 900$$

$$712 + 2x = 900$$

$$2x = 188$$

$$X = 94$$

This is an equation that you can use so that you aren't messing with decimals

As you can see, she should get to work!

Good Luck on your Finals!

Studying Checklist

- ❑ Talk to your teachers about whether or not they will be giving you a study guide. Study guides are only guides of main concepts—make sure you study notes, quizzes, tests and other assignments.
- ❑ Talk to your teachers about the format of the exam—will it be multiple choice? True/False? Essay? Short answer? A mixture of these?
- ❑ Prioritize your exams. Some will require more studying than others. Evaluate all the factors. For example, what do you need to earn on the exam to keep or raise your semester grade? What is the format of the exam? What classes have you needed more study time for throughout the semester?
- ❑ Once you've prioritized your exams, create a schedule for studying. Starting the day before the final is not going to be enough for all or most classes, so aim to start at least the week before.
- ❑ Get organized! Look through all of your old papers and determine which papers will be helpful for studying. When in doubt, ask your teacher!
- ❑ Flashcards are great for memorizing vocabulary words. So is Quizlet!
- ❑ Outlines are great for studying for essay and short answer questions. Focus on creating small outlines to reinforce your understanding of concepts.
- ❑ When you are studying, don't spend valuable time quizzing yourself on concepts you already know. Focus most of your time and energy to the concepts that you have difficulty remembering or understanding.
- ❑ As you are studying, make a list of questions for your teacher. Ask those questions when you review together as a class—or earlier!
- ❑ Sleep well the night before. You won't do as well if you are tired!
- ❑ Get good nutrition! Your body needs fuel to cope with the stress of this week. Breakfast that day is most important.
- ❑ RELAX! Your teachers want you to do well on your exams—but that doesn't mean they will make tests easy. You will have to work for strong grades, but you have the ability to do it. You'll make it to the finish line!

“Do you not know that the runners in the stadium all run in the race, but only one wins the prize? Run so as to win.”
