We are getting a new school!

Just like in life, to build great things, it will take some hard work and inconveniences. Together, we’ve got this!
PHASE 1 begins in December 2018 - December 2019!

It includes demolition of part of the current building and partial construction of the new building.
What happens during PHASE 1?

Art, music will be demolished. The middle school wing with science, math, and Spanish/health will be demolished.

Behind the middle school and in the area that is demolished, the new middle and high school classrooms will be built (two stories), the offices for both schools, and the learning commons (library). New drop off lane near the football field.
Haselden/DSI are the contactors and you should see their logos and badges. Safety is important. You should not see construction workers in the building without identification.
Beginning in December, you will see Modular Classrooms for middle and high school art on the middle school parking lot and they will be there until Fall 2020.
Middle School Parking lot will have barriers to protect the modulars and guide drop off and pick up from middle school.
School staff will need to park behind the gym in football parking lot...be kind and help them carry their bags inside! High school student parking will not change.
Construction fencing will go up behind the middle school and into the courtyard. You will need to walk around fencing to get to Industrial Arts.
In December, the library will close so it can be packed up and part of it turned into two classrooms during the construction.
In December, classes that are moving will start packing up. December 21 (last day before winter break) will be a big pack up and moving day.
Beginning in January, part of the school will be demolished: from the art rooms, to music, to the science, math and Spanish hallway in the middle school.
During phase 1 construction, classes in portions of the building that will be demolished will need to relocated.

When you come back after winter break, some classes will be in new locations for the next year!

Here is the shell game you can expect during Phase 1!
Art will move to the modulars out in the MMS parking lot

Band will move to the wrestling room

Choir/Drama will move to the MMS stage and cafeteria

Mrs. Jacobson will move to Mrs. Hankin’s room.

Mrs. Hankins will move to the computer charging station room.

The computer charging station will move to the hallway outside Mr. Emilsson’s office.
Mr. Hogan will move to Mrs. Soldo’s room.

Mrs. Soldo will share a room with Mrs. Drawbridge.

MMS science lab will move to the Foods room (the foods room will be divided so it can be a science lab and foods)

Mr. Bever and Mrs. Close will move to two new classrooms being built in the library.

The library will be reduced in size, but will be open again in January.

MMS Health classes will be in other classrooms — Ms. Urbine will let you know!
Phase 1 starts this December 2018 and will be complete December 2019. Phase 2 Construction begins January 2020 — after we have moved into the new academic wing that will be built in 2019, then the current building, except for the high school gym, will be demolished. The new cafeteria/auditorium, art rooms, and a new gym will be built. Lunch will be served in the PE complex during this time.

The PE complex will be renovated in two parts during the summer of 2019 and 2020.

The whole project is set to be finished to start the 2020-21 school year!
The Best is Yet to Be!
