- Diabetes risk assessment screening per IDPH rules: BMI>85%; Family History; Ethnic Minority; Signs of Insulin Resistance
- **Pneumococcal Disease: children less than 5 years old in preschool programs must show proof of at least one dose of pneumococcal vaccine**

#### Illinois Physical Exam and Immunization Requirements

*Illinois law requires that all students entering a pre-kindergarten, kindergarten, sixth, or ninth grade program, or students transferring from out-of-state, have a physical examination within one year prior to the date of entering the school. The examination involves all components given on the State of Illinois Certificate of Child Health Examination, including a complete immunization record, medical history, diabetes screening and lead assessments. Students transferring from another Illinois school must present copies of their current Illinois school health records. A dental exam is a State requirement for kindergarten, second, and sixth grades. An eye exam is required for kindergarten students.*

*Section 27-8,1 of the Illinois School Code states "if a child does not comply...then the local school authority shall exclude that child from school until such time as the child presents proof of having had either the health examination or those required immunizations which are medically possible to receive immediately."*

---

Religious Objections: Parents of guardians of a student may object to health examination, immunizations, and vision and hearing screening tests for their children on religious grounds by *detailing, in writing, the specific grounds for the objection*. The objection must set forth the *specific religious belief* that conflict with the examination, immunizations or other medical intervention.

Medical Contra-indications: If a child cannot be fully immunized because of health reasons (medical contra-indication), the physician must state this fact on the health examination certificate. If for medical reasons one or more of the required immunizations must be given after the date of entrance of the current school year, a *schedule* for the administration of the immunizations and a statement of the medical reasons causing the delay must be signed by the health care provider who will administer the needed immunizations; this will be kept on file at the local school. If a child is delinquent for a scheduled appointment for immunization, he/she is no longer considered to be in compliance.

*In the event of one diagnosed case of communicable disease such as measles or whooping cough, any student who is not protected by immunization shall be immediately excluded from school. This exclusion shall be in effect for 21 days following the last reported case or until the student can show proof of immunity.*
