

NALOXONE POLICY

A. Purpose

It is the intent of the Veazie Community School to prevent opioid-related deaths on school premises. Naloxone, commonly known as Narcan, is a medication that can reverse an overdose that is caused by an opioid drug. When administered during an overdose, naloxone blocks the effects of opioids on the brain and respiratory system in order to prevent death. Naloxone has no potential for abuse and is a non-narcotic and non-addicting prescription medication.

It is the policy of the Veazie Community School that all schools stock naloxone as an opioid antagonist to treat a case of suspected opioid overdose in a school setting. Any person trained may administer naloxone to any person suspected of experiencing an opioid-related overdose.

B. Permissions

The superintendent or designee shall maintain a current standing medical order from the school medical advisor that prescribes naloxone for use by a school nurse or other licensed health care professional whose scope of practice includes administration of naloxone {or trained school personnel if a collaborative practice agreement is in place} to assist any individual suspected of experiencing an opioid related overdose on school grounds. A school nurse or other licensed health care professional whose scope of practice includes administration of naloxone {or trained school personnel if a collaborative practice agreement is in place} may carry and administer naloxone on school grounds with a standing order from the school health advisor.

C. Procurement of Naloxone

The superintendent, principal, certified school nurse, or designee will be responsible for the procurement of naloxone. The school medical advisor shall prepare standing orders.

D. Storage

Naloxone will be clearly marked and stored in an unlocked storage cabinet in each nurse's office {or other designated area such as with AED}. The school nurse will ensure that all other trained staff are aware of the naloxone storage location. Naloxone will be stored in accordance with the manufacturer's instructions to avoid extreme cold, heat and direct sunlight.

E. Use of Naloxone

Follow the protocol for the administration of naloxone for suspected opioid overdose.

F. Follow Up

After administration of naloxone, the person administering naloxone will follow Veazie Community School policies for incident reporting. Notify district-level administration.
