March 4, 2020

Dear Butteville Parents and Families,

This letter is to update you on our septic issues. The County Building Department recognized the severity of Butteville's situation and kindly expedited the permit process for the septic system rebuild. Jerry Lemos from the County Building Department submitted the new leach field design and Bill Navarre will oversee its construction. We are permitted, designed, and ready to rebuild!

The construction will begin on the afternoon of Friday, March 13, 2020, and is expected to be completed by the end of Spring Break. Because of the noise of construction, machinery, and trenches dug across the playground, we will close school for the week of March 16-20. We are waiting to hear from the California Department of Education (CDE) on whether we will need to make up the missed days at the end of the school year. We will keep you updated on our end-of-year status once we hear from the CDE.

We are truly sorry for any inconvenience that this may cause your family, but the good news is our students will be using flush toilets when they return back to school after Spring Break (if there are no unforeseen construction setbacks). Please call me if you have any specific questions at 938-2255. I hope your family gets to do something really special with this extra time off! We'll see everyone back at school on Monday, March 30, 2020.

Sincerely,

Eric J. Bragg
Principal
