Coronavirus Disease 2019 (COVID-19)

Travel Related FAQ and Answers:

Canceling or Postponing Travel

Should I cancel my trip?

CDC provides recommendations on postponing or canceling travel. These are called travel notices and are based on assessment of the potential health risks involved with traveling to a certain area. A list of destinations with travel notices is available at <https://www.cdc.gov/coronavirus/2019-ncov/travelers/index.html>.

Warning Level 3: CDC recommends travelers avoid all nonessential travel to destinations with level 3 travel notices because of the risk of getting COVID-19.

Alert Level 2: Because COVID-19 can be more serious in older adults and those with chronic medical conditions, people in these groups should talk to a healthcare provider and consider postponing travel to destinations with level 2 travel notices.

Watch Level 1: CDC does not recommend canceling or postponing travel to destinations with level 1 travel notices because the risk of COVID-19 is thought to be low. If you travel, take the following routine precautions:

- Avoid contact with sick people.
- Avoid touching your eyes, nose, or mouth with unwashed hands.
- Clean your hands often by washing them with soap and water for at least 20 seconds or using an alcohol-based hand sanitizer that contains 60%–95% alcohol. Soap and water should be used if hands are visibly dirty.
 - It is especially important to clean hands after going to the bathroom; before eating; and after coughing, sneezing or blowing your nose.

Are layovers included in CDC's recommendation to avoid nonessential travel?

Yes. Layovers at airports in destinations with level 3 travel notices are included in CDC's recommendation to avoid nonessential travel. If a layover is unavoidable, CDC recommends that travelers not leave the airport. Travelers with layovers may still be subject to screening and monitoring when entering the United States.

Air or Cruise Travel

[Is it safe to go on a cruise?](#)

Cruises put large numbers of people, often from countries around the world, in frequent and close contact with each other. To reduce spread of respiratory viruses, including COVID-19, CDC recommends that passengers:

- Avoid close contact with people who are sick.
- Avoid touching your eyes, nose, and mouth with unwashed hands.
- Wash your hands often with soap and water for at least 20 seconds, especially after going to the bathroom; before eating; and after blowing your nose, coughing, or sneezing.
 - If soap and water are not readily available, use an alcohol-based hand sanitizer that contains 60%–95% alcohol.
- Stay in your cabin when you are sick and let the onboard medical center know immediately if you develop a fever (100.4°F/38°C or higher), begin to feel feverish, or have other symptoms (such as cough, runny nose, shortness of breath, or sore throat).

[What is the risk of getting COVID-19 on an airplane?](#)

Because of how air circulates and is filtered on airplanes, most viruses and other germs do not spread easily on airplanes. Although the risk of infection on an airplane is low, travelers should try to avoid contact with sick passengers and wash their hands often with soap and water for at least 20 seconds or use hand sanitizer that contain 60%–95% alcohol.

For more information: [Exposure Risk During Travel](#)

[What happens if there is a sick passenger on a flight?](#)

Under current federal regulations, pilots must report to CDC all illnesses and deaths before arriving to the United States. If a sick traveler is considered to be a public health risk, CDC works with local and state health departments and international public health agencies to [contact passengers and crew](#) exposed to that sick traveler—according to CDC disease protocols. Be sure to give the airline your current contact information when booking your ticket.

CORONAVIRUS DISEASE 2019

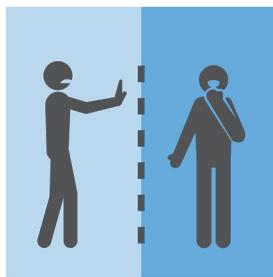

There are no confirmed cases of COVID-19 in Ohio.
Please continue to protect yourself from all
infectious diseases by using these precautions.

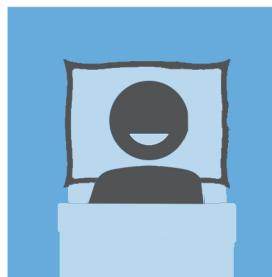

PREVENTION

STAY HOME
WHEN YOU ARE
SICK

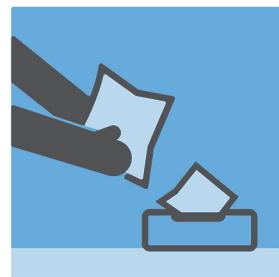

AVOID CONTACT
WITH PEOPLE
WHO ARE SICK

GET ADEQUATE SLEEP
AND EAT WELL-
BALANCED
MEALS

WASH HANDS OFTEN
WITH WATER AND SOAP
(20 SECONDS
OR LONGER)

DRY HANDS WITH
A CLEAN TOWEL
OR AIR DRY
YOUR HANDS

COVER YOUR MOUTH
WITH A TISSUE OR
SLEEVE WHEN
COUGHING OR SNEEZING

AVOID TOUCHING
YOUR EYES, NOSE,
OR MOUTH WITH
UNWASHED HANDS
OR AFTER
TOUCHING SURFACES

CLEAN AND DISINFECT
“HIGH-TOUCH”
SURFACES OFTEN

CALL BEFORE VISITING
YOUR DOCTOR

PRACTICE GOOD
HYGIENE HABITS

CLEAN ALL “HIGH-TOUCH” SURFACES EVERY DAY

High touch surfaces include counters, tabletops, doorknobs, bathroom fixtures, toilets, phones, keyboards, tablets, and bedside tables. Also, clean any surfaces that may have blood, stool, or body fluids on them. Use a household cleaning spray or wipe according to the label instructions. Labels contain instructions for safe and effective use of the cleaning product including precautions you should take when applying the product, such as wearing gloves and making sure you have good ventilation during use of the product.
