

R 2361 ACCEPTABLE USE OF COMPUTER NETWORKS/ COMPUTERS AND RESOURCES

The school district provides computer equipment, computer services, and Internet access to its students and staff for educational purposes only. The purpose of providing technology resources is to improve learning and teaching through research, teacher training, collaboration, dissemination and the use of global communication resources.

For the purpose of this Policy and Regulation, "computer networks/computers" includes, but is not limited to, the school district's computer networks, computer servers, computers, other computer hardware and software, Internet equipment and access, and any other computer related equipment.

For the purpose of this Policy and Regulation, "school district personnel" shall be the person(s) designated by the Superintendent to oversee and coordinate the school district's computer networks/computer systems. School district personnel will monitor networks and online activity, in any form necessary, to maintain the integrity of the networks, ensure proper use, and to be in compliance with Federal and State laws that regulate Internet safety.

Due to the complex association between government agencies and computer networks/computers and the requirements of Federal and State laws, the end user of the school district's computer networks/computers must adhere to strict regulations. Regulations are provided to assure staff, community, students, and parent(s) or legal guardian(s) of students are aware of their responsibilities. The school district may modify these regulations at any time. The signatures of the student and his/her parent(s) or legal guardian(s) on a district-approved Consent and Waiver Agreement are legally binding and indicate the parties have read the terms and conditions carefully, understand their significance, and agree to abide by the rules and regulations established under Policy and Regulation 2361.

Students are responsible for acceptable and appropriate behavior and conduct on school district computer networks/computers. Communications on the computer networks/computers are often public in nature and policies and regulations governing appropriate behavior and communications apply. The school district's networks, Internet access, and computers are provided for students to conduct research, complete school assignments, and communicate with others. Access to computer networks/computers is given to students who agree to act in a considerate, appropriate, and responsible manner. Parent(s) or legal guardian(s) permission is required for a student to access the school district's computer networks/computers. Access entails

responsibility and individual users of the district computer networks/computers are responsible for their behavior and communications over the computer networks/computers. It is presumed users will comply with district standards and will honor the agreements they have signed and the permission they have been granted. Beyond the clarification of such standards, the district is not responsible for the actions of individuals utilizing the computer networks/computers who violate the policies and regulations of the Board.

Computer networks/computer storage areas shall be treated in the same manner as other school storage facilities. School district personnel may review files and communications to maintain system integrity, confirm users are using the system responsibly, and ensure compliance with Federal and State laws that regulate Internet safety. Therefore, no person should expect files stored on district servers will be private or confidential.

Acceptable Use of Computer Networks/
Computers and Resources

Because the school district provides, through connection to the Internet, access to other computer systems around the world, students and their parent(s) or legal guardian(s) should be advised the Board and school district personnel have no control over content. While most of the content available on the Internet is not offensive and much of it is a valuable educational resource, some objectionable material exists. Even though the Board provides students access to Internet resources through the district's computer networks/computers with installed appropriate technology protection measures, parents and students must be advised potential dangers remain and offensive material may be accessed notwithstanding the technology protection measures taken by the school district.

Students and their parent(s) or legal guardian(s) are advised some systems and Internet sites may contain defamatory, inaccurate, abusive, obscene, profane, sexually oriented, threatening, racially offensive, or otherwise illegal or offensive material. The Board and school district personnel do not condone the use of such materials and do not permit usage of such materials in the school environment. Parent(s) or legal guardian(s) having Internet access available to their children at home should be aware of the existence of such materials and monitor their child's access to the school district system at home. Students knowingly bringing materials prohibited by Policy and Regulation 2361 into the school environment will be disciplined in accordance with Board policies and regulations and such activities may result in termination of such students' accounts or access on the school district's computer networks and their independent use of computers.

On-line Conduct

Any action by a student or other user of the school district's computer networks/computers that is determined by school district personnel to constitute an inappropriate use of the district's computer networks/computers or to improperly restrict or inhibit other persons from using and enjoying those resources is strictly prohibited and may result in limitation on or termination of an offending person's access and other consequences in compliance with Board policy and regulation. The user specifically agrees not to submit, publish, or display any defamatory, inaccurate, abusive, obscene, profane, sexually oriented, threatening, racially offensive, or otherwise illegal or offensive material; nor shall a user encourage the use, sale, or distribution of controlled substances. Transmission of material, information or software in violation of any local, State or Federal law is also prohibited and is a breach of the Consent and Waiver Agreement.

Students and their parent(s) or legal guardian(s) specifically agree to indemnify the school district and school district personnel for any losses, costs, or damages, including reasonable attorneys' fees incurred by the Board relating to, or arising out of any breach of this section by the student.

Computer networks/computer resources are to be used by the student for his/her educational use only; commercial uses are strictly prohibited.

Software Libraries on the Network

Software libraries on or through the school district's networks are provided to students as an educational resource. No student may install, upload, or download software without the expressed consent of appropriate school district personnel. Any software having the purpose of damaging another person's accounts or information on the school district computer networks/computers (e.g., computer viruses) is specifically prohibited. School district personnel reserve the right to refuse posting of files and to remove files. School district personnel further reserve the right to immediately limit usage or terminate the student's access or take other action consistent with the Board's policies and regulations of a student who misuses the software libraries.

Copyrighted Material

Copyrighted material must not be placed on any system connected to the computer networks/computers without authorization. Students may download copyrighted material for their own use in accordance with Policy and Regulation 2531 - Use of Copyrighted Materials. A student may only redistribute a copyrighted program with the expressed written permission of the owner or authorized person. Permission must be specified in the document, on the system, or must be obtained directly from the author or authorized source.

Public Posting Areas (Message Boards, Blogs, Etc.)

Messages are posted from systems connected to the Internet around the world and school district personnel have no control of the content of messages posted from these other systems. To best utilize system resources, school district personnel will determine message boards, blogs, etc. that are most applicable to the educational needs of the school district and will permit access to these sites through the school district computer networks. School district personnel may remove messages that are deemed to be unacceptable or in violation of Board policies and regulations. School district personnel further reserve the right to immediately terminate the access of a student who misuses these public posting areas.

Real-time, Interactive, Communication Areas

School district personnel reserve the right to monitor and immediately limit the use of the computer networks/computers or terminate the access of a student who misuses real-time conference features (talk/chat/Internet relay chat).

Electronic Mail

Electronic mail ("email") is an electronic message sent by or to a person in correspondence with another person having Internet mail access. The school district may or may not establish student email accounts. In the event the district provides email accounts, all messages sent and received on the school district computer networks/computers must have an educational purpose and are subject to review. Messages received by a district-provided email account are retained on the system until deleted by the student or for a period of time determined by the district. A canceled account will not retain its emails. Students are expected to remove old messages within fifteen days or school district personnel may remove such messages. School district personnel may inspect the contents of emails sent by a student to an addressee, or disclose such contents to other than the sender or a recipient when required to do so by the policy, regulation, or other laws and regulations of the State and Federal governments. The Board reserves the right to cooperate fully with local, State, or Federal officials in any investigation concerning or relating to any email transmitted or any other information on the school district computer networks/computers.

Disk Usage

The district reserves the right to establish maximum storage space a student receives on the school district's system. A student who exceeds his/her quota of storage space will be advised to delete files to return to compliance with the predetermined amount of storage space. A student who remains in noncompliance of the storage space allotment after seven school days of notification may have their files removed from the school district's system.

Security

Security on any computer system is a high priority, especially when the system involves many users. If a student identifies a security problem on the computer networks/computers, the student must notify the appropriate school district staff member. The student should not inform other individuals of a security problem. Passwords provided to students by the district for access to the district's computer networks/computers or developed by the student for access to an Internet site

Attempts to log in to the system using either another student's or person's account may result in termination of the account or access. A student should immediately notify the Principal or designee if a password is lost or stolen, or if they have reason to believe that someone has obtained unauthorized access to their account. Any student identified as a security risk will have limitations placed on usage of the computer networks/computers or may be terminated as a user and be subject to other disciplinary action.

Vandalism

Vandalism to any school district owned computer networks/computers may result in cancellation of system privileges and other disciplinary measures in compliance with the district's discipline code. Vandalism is defined as any malicious attempt to harm or destroy data of another user, the system, or any of the agencies or other computer networks/computers that are connected to the Internet backbone or of doing intentional damage to hardware or software on the system. This includes, but is not limited to, the uploading or creation of computer viruses.
