Midwest Region State Powerpoint or Poster

Students need to complete a State Report Powerpoint or Poster for their assigned Midwest state. **This project will be due and presented to the class when students return to school.**

Powerpoint Option 1: One slide per category. There are 9 categories on the outline page. Each slide should include the title and include the specific number of details given on the outline. These slides can include a few small pictures or symbols to represent the assigned state.

Poster Option 2: Using the state outline, students need to make a poster representing all the categories on the state report outline. Each category needs to be properly labeled and include a few visual representations(printed pictures, drawings, illustrations etc...). The poster should be done neatly, colorfully and include a title.

Remember to practice for your Midwest states and capitals quiz on return to school.
