

Everyone a learner. Everyday. The mission of Bryan County's Community Education division is to make learning a never-ending process. Our goal is to provide educational, recreational and enrichment opportunities for Bryan County residents, regardless of age or background. We offer diverse classes for both adults and children, making our schools a place of learning for the entire community.

The qualified instructors who teach our classes come from our own community. They share their talents in a variety of classes ranging from art, gymnastics, dance and piano to karate, soccer, tennis and more. Some classes are year-long, while shorter-term classes such as baby-sitting or quilt-making are scheduled for several sessions throughout the year.

The program serves approximately 900 students in its weekly classes. After registering, students will receive a confirmation letter informing them of the beginning date and time of their class.
