

For this assignment I will use this rubric to grade your career sector project. I will be looking at your project and giving you a total grade based on how you did. Remember the requirement is for you to choose five different career sectors and choose a career out of each one. The point of this assignment is to show you how many different jobs are out there. Even if you choose a job you are interested in right now you can learn more about the different jobs out there.

You will also earn 10 points on the day you present. You may have notecards to help you but please remember to not read from your cards. You should know your slides well enough to not read off the board. Total this assignment is worth 40 points.

Criteria	1	2	3	4	5
5 different careers	The student had information on 1 career only	Choose 2 different careers	Choose 3 different careers	Choose 4 different careers	Choose 5 different careers
Sectors	Only choose from one career sector	Choose from 2 different career sectors	Choose from 3 different career sectors	Choose from four different career sectors	Choose from 5 different career sectors
