

# Microsoft Teams

Teams is the digital hub that wraps around Class Notebook so you can have conversations, collaborate on other apps, manage assignments in the same space as your Class Notebook.

## Create modern collaborative classrooms

### Introducing Microsoft Teams in Office 365 for Education

**Easily manage your class** with always up-to-date student rosters from School Data Sync

**Engage students and personalize learning** through persistent conversations, video, and voice

**Distribute, collect, and grade assignments** without ever leaving the Teams app

**Create and share content as a class** with familiar Office apps like OneNote, Word, Excel and PowerPoint

**Customize your classroom** with integrations from education software developers like busuu, Canvas, Flipgrid, and Kahoot!

## Work together in a single hub

### Use Microsoft Teams for staff and school collaboration

**Collaborate in a hub for teamwork** built for the way that teachers, students, and staff really work

**Stay connected with teachers** in personal learning communities to share best practices for teaching and learning

**Easily share information with staff** on school-wide initiatives and professional development plans

**Come together in a team** for any team-based or project-based activity, like school student groups or events

Learn more on the Microsoft Educator Community & get the guides for Educators, School Leaders, & IT Admins.

Mr. Pavls 4/30 4:13 PM  
Please review these materials on Mesopotamia and ancient Egypt and then take 5 minutes and share how their culture and inventions are still relevant today.

**Mesopotamia**  
Mesopotamia (from the Greek, meaning "between two rivers") was an ancient region in the eastern Mediterranean bounded in the northeast by the Zagros Mountains and in the southeast by the Arabian PL...  
www.ancient.eu

Hardi Rutel 4/30 7:50 PM  
Writing was invented - cuneiform, a system of wedge shaped marks that evolved to simple, abstract character sets

Jan Konecny 4/30 7:54 PM  
Mesopotamian astronomers worked out a 12-month calendar based on the cycles of the moon. They divided the year into two seasons: **summer** and **winter**.

Hardi Rutel 4/30 7:54 PM  
That would be a long summer break! 🙄

Huang Si 4/30 7:55 PM  
Egyptians invented the toothbrush and toothpaste in an effort to take care of their teeth. Their bread had so much grit and sand in it.

Jia Chiang 4/30 7:57 PM

New assignment

Discard Save as draft Assign

Title  
KM HW1: Graph your data

Date due  
Wed May 3

Time due  
11:59 PM

Instructions  
Make a new page in your OneNote called "Motion graphs." Make it into graph paper and graph all three sets of data you collected in class today, with time on the X axis, and position on the Y axis. Remember to label the axes with both name and units, and copy each data table next to its graph.

Schedule to assign later  No

Late turn-in allowed  No

Points  No

Attach reference materials

Specify what you'd like students to turn in

## **Question and Answers**

*Can you import previous ClassNotebooks?*

You can copy/move your existing Class Notebook into your new teams SharePoint site (if you just want content, no permissions), or add a Website Tab to your existing Class Notebook online link (to keep permissions in tact).

*Will students who joined a class after an assignment is set have the assignment added or can it be added?*

Yes, students who join a class later will receive those assignments.

*Is it better to download and use the desktop app version?*

You will get the full set of features with the desktop app version, like audio and visual.

*Do we have an overview of the Feature in classroom and what they are called in Teams, like Teams = classes*

We are building a support document that chronicles that exact comparison and it will be available this month.

*Will there be a dedicated tile for teams for education or will they access it via the teams tile they see today?*

Same tile.

*What about security? Can students create secret or private teams?*

Team creation is a control that IT Admins can manage for all students.

*Once Teams for Edu is available, does our IT admin need to switch something on? Or will it show up as a tile in the App Launcher?*

Teams is available in Office 365 for Education today. Any users with a Faculty/Staff license can access now pending IT hasn't actively removed licenses or turned Teams off. Students can only access if IT turn on right now. Check your app launcher to see if you have it! If not, please contact your IT.

*Are you building in a parent component where they can log in and check student assignments and progress?*

Yes, we are working through parent access and the right scenarios for Teams. We will have external guest access available this summer, but guest access is best used for bringing in outside experts (lecturers, etc.) into the class discussion
