ISASP Testing Results

ISASP Testing has some initial results and they are encouraging, we do not have final/complete scores to give you an update, but from the initial numbers, there is a lot of growth and improvement.

Summer School Planning Continues:

The number of students attending as of turning in this report, we have about 50 kids committed to coming to summer school. There are a few we're still reaching out to about attending as it would be beneficial but this is where we're at for now. This means our groups will be about 5-6 kids per group based on the recommended hires for later. This is on par with where we have been in previous years.

PK round-up

We had our PK roundup on the 21st of April. All that were signed up attend. There were 24 kids that came, and as always we hope to pick up a few more along the way come registration time, I hope we are closer to 30 or so, more would be great. Spread the word if you know of any kids that will be 4 by the September 15th deadline, we would love to have them.

Spring events/field trips

- 4/5th track meet is scheduled for May 16th. 1:30 this kicks off and is always a good time.
- I have gotten several compliments about our kids from recent field trips to Bayer, Herbert Hoover Presidential Museum, and Louisa County Conservation. Lots of great opportunities and experiences.
- PBIS fun day, May 18th -Hope for warm weather and there is always room in the dunk tank.
- Awards and recognition on the blacktop May 26 at 9:00am.

Resurfacing Blacktop Update:

Rob is getting pricing for blacktop repair/resurface, hoping there are numbers in for this. The old hoops are removed. Pricing for new ones are in the packet. There will be minor concrete work needed that our staff can do for a footing for the new hoops when we are ready for them.

End of year assessments/screeners:

These should be wrapping up for FAST fluency screeners, SABERS, and aMath as well as any curriculum assessments should be done or soon to be. I will report out on growth at the next meeting in June.

Other/Questions:

As always, please let me know if you have any questions.

- ii. 602.1–Curriculum Development
- iii. 602.2–Curriculum Adoption
- iv. 602.3–Curriculum Evaluation
- v. 602.4–Pilot–Experimental–Innovative Projects

Background: These are part of our regular policy rotation.

602.1 CURRICULUM DEVELOPMENT

Curriculum development is an ongoing process in the school district and consists of both research and design. Research is the studious inquiry and critical investigation of the various content areas for the purpose of revising and improving curriculum and instruction based on relevant information pertaining to the discipline. This study is conducted both internally (what and how we are currently doing at the local level) and externally (what national standards, professional organization, recognized experts, current research, etc. tell us relative to the content area). Design is the deliberate process of planning and selecting the standards and instructional strategies that will improve the learning experiences for all students. The board delegates the curriculum development process to the Superintendent, who will make curriculum development recommendation and submit them to the board for final approval.

A systematic approach to curriculum development (careful research, design, and articulation of the curriculum) serves several purposes:

- Focuses attention on the content standards of each discipline and ensure the identified learnings are rigorous, challenging, and represent the most important learning for our students.
- Increases the probability that students will acquire the desired knowledge, skills, and dispositions and that our schools will be successful in providing appropriate learning experiences.
- Facilitates communication and coordination.
- Improves classroom instruction.

The superintendent is responsible for curriculum development and for determining the most effective method of conducting research and design activities. A curriculum framework will describe the processes and procedures that will be followed in researching, designing, and articulating each curriculum area. This framework will at a minimum, describe the processes and procedures for the following curriculum development activities to:

- Study the latest thinking, trends research, and expert advice regarding the content/discipline;
- Study the current status of the content/discipline (what and how well students are currently learning);
- Identify content standards, benchmarks, and grade level expectations for the content/discipline;
- Describe the desired learning behaviors, teaching, and learning environment related to the content/discipline;
- Identify differences in the desired and present program and develop a plan for addressing the differences;
- Communicate with internal and external publics regarding the content area;
- Involve staff, parents, students, and community members in curriculum development decisions;

- Verify how the standards and benchmarks of the content/discipline support each of the broader student learning goals and provide a K-12 continuum that builds on the prior learning of each level.
- Ensure proposed curriculum complies with applicable laws;
- Align annual improvement goals with needs assessment information

It is the responsibility of the superintendent to keep the board apprised of necessary curriculum revisions, progress, or each content area related to curriculum development activities, and to develop administrative regulations for curriculum development including recommendations to the board.

602.2 CURRICULUM ADOPTION

Without careful and continuing attention to implementation, planned changes in curriculum and instruction rarely succeed as intended. How change is put into practice, to a large extent, determines how well it fares.

Implementation refers to what actually happens in practice as compared to what was supposed to happen. Curriculum implementation includes the provision of organized assistance to staff in order to ensure that the newly developed curriculum and the most powerful instructional strategies are actually delivered at the classroom level. There are two components of any implementation effort that must be present to guarantee the planned changes in curriculum and instruction succeed as intended.

- Understanding the conceptual framework of the content/discipline being implemented; and,
- Organized assistance to understand the theory, observe exemplary demonstrations, have opportunities to practice, and receive coaching and feedback focused on the most powerful instructional strategies to deliver the content at the classroom level.

The Superintendent is responsible for curriculum implementation and for determining the most effective way of providing organized assistance and monitoring the level of implementation. A curriculum framework will describe the processes and procedures that will be followed to assist all staff in developing the knowledge and skills necessary to successfully implement the developed curriculum in each content area. This framework will, at a minimum, describe the processes and procedures for the following curriculum implementation activities to:

- Study and identify the best instructional practices and materials to deliver the content;
- Describe the procedures for the purchase of instructional materials and resources;
- Identify/develop exemplars that demonstrate the learning behaviors, teaching, and learning environment to deliver the content;
- Study the current status of instruction in the content area (how teachers are teaching);
- Compare the desired and present delivery system, identify differences (gap analysis) and develop a plan for addressing the differences;
- Organize staff into collaborative study teams to support their learning and implementation efforts (address the gaps);
- Provide ongoing professional development related to instructional strategies and materials that focuses on theory, demonstration, practice, and feedback;
- Regularly monitor and assess the level of implementation;
- Communicate with internal and external publics regarding curriculum implementation;
- Involve staff, parents, students, and community members in curriculum implementation decisions;
- Ensure the curriculum framework complies with applicable laws;
- Provide professional development to staff to support effective curriculum implementation.

It is the responsibility of the superintendent to keep the board apprised of curriculum implementation activities, progress of each content area related to curriculum implementation

activities, and to develop administrative regulations for curriculum implementation including recommendations to the board.

602.3 CURRICULUM EVALUATION

When deemed necessary by the superintendent, and whenever a new program is proposed, the board will review the curriculum to determine its strengths and weaknesses. The board may authorize the superintendent to appoint an ad hoc advisory committee to review the curriculum.

The Wapello Board of Directors shall review the students' performance on standardized tests, district created assessment, courses, and other indicators of student achievement as it related to the District's Standards/Benchmarks and Critical Objectives. It shall be the responsibility of the superintendent to provide the board/parents/community with the assessment scores on an annual basis.

602.4 PILOT - EXPERIMENTAL - INNOVATIVE PROJECTS

The Wapello Board of Directors welcomes new ideas in curriculum. Proposals for pilot or experimental projects shall first be reviewed and analyzed by the superintendent. Projects recommended by the superintendent will be considered by the board. Pilot and experimental projects approved by the board, the Iowa Department of Education, or the United States Department of Education may be utilized in the education program.

Students, who may be or are asked to participate in a research or experimental project or program, must have their parents' written consent on file prior to participating in the project or program. A research or experimental program or project requiring parents' prior written consent is a program or project designed to explore or develop new or unproven teaching methods or techniques. These programs or projects shall be designated as research or experimental projects or programs. The educational materials of a program or project designated as a research or experimental program or project may be inspected and reviewed by the parents of the students participating or being considered for participation in the program or project. The inspection and review by the parents shall be in accordance with board policy 605.2, "Instructional Materials Inspection."

604.06 INSTRUCTION AT A POST-SECONDARY EDUCATIONAL INSTITUTION

In accordance with this policy, students in grades nine through twelve may receive academic or career and technical education credits that count toward the graduation requirements set out by the board for courses successfully completed in post-secondary educational institutions. Students and parents or guardians shall be made aware of the post-secondary instructional opportunities as part of the development of each student's individual career and academic plan as required by law. The Superintendent or designee is responsible for developing the appropriate forms and procedures for implementing this policy and the following post-secondary educational opportunities:

Concurrent Enrollment

The board may, in its discretion, enter into a contractual agreement with a community college to provide courses for eligible students in grades nine through twelve when comparable courses are not offered by the school district. Notice of the availability of the concurrent enrollment program shall be included in the school district's registration handbook, and the handbook shall identify which courses, if successfully completed, generate post-secondary credit. Students shall not be charged tuition for concurrent enrollment courses and shall not be required to reimburse the school district for tuition if they do not successfully complete a course. Students or their parents or guardians may be required to pay a fee consistent with the school district's established textbook policy and other materials for the concurrent enrollment course to the extent permitted by law. Students or their parents or guardians may also be required to provide their own transportation to and from concurrent enrollment courses to the extent permitted by law. However, transportation shall be the responsibility of the school district for any contracted course that is used to meet school district accreditation requirements.

Students who successfully complete a concurrent enrollment course, as determined by the postsecondary institution, shall receive postsecondary credit in accordance with the institution's policies and high school credit that will be reflected on their high school transcript. The Superintendent or designee shall grant to a student who successfully completes a concurrent enrollment course a unit of high school graduation credit for every unit of high school level instruction successfully completed.

Post-Secondary Enrollment Option

Ninth and tenth grade students who have been identified by the school district as gifted and talented, and eligible eleventh and twelfth grade students, may utilize the Post-Secondary Enrollment Option ("PSEO") program. To qualify, a course must be a nonsectarian, credit-bearing course that leads to a degree, and in the areas of: mathematics, science, social sciences, humanities, career and technical education. A course is not eligible for PSEO if a comparable course is offered by the school district. In addition, courses at a community college with which

the district has a concurrent enrollment agreement are not eligible for PSEO. Students shall not be charged for tuition, textbooks, materials, or fees related to a PSEO course with the exception of equipment that becomes the property of the student.

The school district shall reimburse the post-secondary institution for tuition and other expenses for each PSEO course up to \$250. Students who successfully complete a PSEO course, as determined by the postsecondary institution, shall receive postsecondary credit and high school credit. The Superintendent or designee shall grant to a student who successfully completes a PSEO course a unit of high school graduation credit for every unit of high school level instruction successfully completed.

Transportation to and from the postsecondary institution is the responsibility of the student or parent or legal guardian of the student enrolled in a PSEO course. Eligible students may take up to seven hours of post-secondary credit during the summer months and receive high school credit upon successful completion of a post-secondary course. However, the student or student's parent or legal guardian are responsible for all costs associated with courses taken during the summer.

Students who fail a PSEO course and fail to receive credit are required to reimburse the school district for all costs directly related to the course up to the \$250 reimbursement maximum. Prior to registering, students under the age of eighteen are required to have a parent or guardian sign a form indicating that the parent is responsible for the costs of the course should the student fail the course and fail to receive credit. Reimbursement waivers may be granted by the board if sufficient verification is provided to show that the student was unable to complete the course for reasons outside the student's control including but not limited to physical incapacity, a death in the student's immediate family, or a move out of the school district.

~~If a student is unable to demonstrate proficiency or the school district or accredited nonpublic school determines that the course unit completed by the student does not meet the school district's standards, the superintendent shall provide in writing to the student's parent or guardian the reason for the denial of credit.~~

701.2 TRANSFER OF FUNDS

When the necessity for a fund has ceased to exist, the balance may be transferred to another fund or account by board resolution. The Wapello Community School District monies received for a specific purpose or upon vote of the people may only be transferred, by board resolution when the purpose for which the monies were received has been completed. Voter approval is required to transfer monies to the general fund from the capital projects fund and debt service fund.

If all requirements for district use of funds ~~calculated~~ under the Preschool Foundation Aid, Professional Development Supplement, Home School Assistance Program, Teacher Leadership Supplement, or any discontinued fund ~~are~~ have been met and funds remain unexpended and unobligated at the end of the fiscal year, the district may transfer all or a portion of remaining funds by passage of a board resolution into the district's flexibility account in accordance with law. Before the expenditure of amounts in the flexibility account, the district shall publish notice of the time, date, and place of a public hearing on the proposed resolution approving said expenditures. The board must find and certify that the statutory requirements of each original source of funds have been met before adopting the resolution approving the expenditures. The district will present a copy of the signed board resolution to the Department of Education.

The District may transfer by board resolution from the general fund to the student activity fund an amount needed to purchase or refurbish protective and safety equipment required for any extracurricular interscholastic athletic contest or competition sponsored or administered by the Iowa High School Athletic Association of Iowa Girls High School Athletic Union.

If the before and after school program exceeds the amount necessary to operate the program, the excess amount may, following a public hearing, be transferred by resolution of the board of directors of the school corporation for deposit in the general fund of the school corporation to be used for school district general fund purposes. The district will present a copy of the signed board resolution to the Department of Education.

The district may choose to request approval from the School Budget Review Committee to transfer funds to make a program whole, prior to its elimination.

Temporary transfers (loans) of funds are permitted between funds but must be repaid to the originating fund, with interest, by October 1 following the end of the fiscal year.

It shall be the responsibility of the board secretary to make recommendations to the board regarding and to provide the documentation justifying the transfer.

Item 11d

Object: Consideration to Approve First Reading of Board Member Social Media Engagement Policy

Background: This is a recommended policy from IASB, but it is optional. School boards have the option to adopt it or not.

200.4 BOARD MEMBER SOCIAL MEDIA ENGAGEMENT

The board sees the value in promoting the excellent work and accomplishments of the district's students and staff. Social media is one of many effective communication tools that the district may utilize. Board members have been publicly elected to govern the district and accept a fiduciary responsibility. That responsibility means board members agree to always act in the best interests of the district. For this reason, the board shall expect that individual communications and social media posts made by board members will reflect the values and decorum expected of elected officials in the school community.

All board members enjoy rights to freedom of speech under both the U.S. and Iowa Constitutions. As such, the district will not limit protected speech of any board members. Certain categories of speech are not protected and may be subject to regulation. Additionally, board members should be aware that protected speech can still subject individuals to legal liability. If using social media to discuss district related matters, board members should be aware that they may be prohibited from blocking individual communications and posters based upon the content of their posts.

The board as a whole and individual board members in their governance role have legal obligations to safeguard the privacy of information related to student and employee matters. Board members will refrain from posting or communicating on social media in a way that violates the district's obligation to protect the privacy of its students and employees.

Board members are uniquely positioned in the school community to be both accessible and responsive to community concerns about the effective governance of the district. As a result, the board will remember their obligations to safeguard student and employee privacy when responding to any social media posts or communications, even if the response is intended to correct information for the rest of the school community. Board members will direct concerned individuals to the appropriate district staff to address their inquiry or complaint in accordance with board policy.
