

Transitioning to Remote Education ...the New Normal

Join us for an informational webinar on
Wednesday, April 1st, 4:30 p.m. EST

Global Teletherapy, ZIA Learning, and HyperFocus have come together in this time of uncertainty to bring you an informational webinar to get your school up and running as quickly as possible.

Lynne Inabnitt, M.A. CCC-SLP

As Lead Therapist, **Lynne** works closely with a group of therapy providers, helping to recruit, train, supervise, provide clinical support and more. Lynne has a Master of Arts in Speech Language Pathology, ASHA certification, and is licensed to practice in numerous states across the U.S.

Robin Gonzales, President of ZIA Learning

Robin is the founder and President of Zia Learning. With over 19 years of experience in online learning. Her work centers around using online, blended and personalized learning and 21st Century Tools to address the diverse needs of today's learners.

During this time we understand that some of the resources schools are beginning to use full-time are options they have not considered before. This can be a very stressful time in decision-makers' lives and we want to help with that. In this webinar, Lynne will explain:

- Why teletherapy is a viable option
- How teletherapy will help them meet their IEP goals for the rest of the year
- Measure taken by Speech Language, Mental Health and Occupational therapists to ensure that every student continues their academic success.

As students make the rapid transition to online learning, it is critical that we support their learning, social and mental health needs. Teachers will be provided actionable steps that they can take now to:

- Increase engagement in an online classroom
- Provide opportunities for students to collaborate and work in groups
- Support students with time management, goal setting and communication skills in an online environment
- Work with families and parents as partners in students' online education

Melissa Slone, Co-founder and CEO of HyperFocus

Melissa will be moderating the webinar for us. Melissa founded Hyperfocus Services to change the way people collaborate, lead, and partner together to make a positive impact and drive success. She has proven results working in startups, turnarounds, revitalizations and high growth organizations as well as with many of the nation's largest school districts.
