The Dino Guide

My name is Rosa Gonzales. When I grow up I want to be just like my aunt Carmen! Aunt Carmen works in a natural history museum as a tour guide. That means she helps people understand the things they are looking at. My aunt's job is in the best part of the museum. She gives tours of the dinosaur exhibits. We call her the "Dino Guide."

Aunt Carmen says that the largest dinosaurs were more than 130 feet tall. They could have looked in the windows of a six-story building. My aunt is often invited to talk about dinosaurs at schools. She's been promising to bring a dinosaur egg to my class! She says the egg was found in a nest on the ground. It is only about 7 inches across. That is much smaller than I would expect a dinosaur's egg to be. Who could have thought that a dinosaur could begin its life inside an egg that size?
