

March 2, 2020

Good evening Ridgefield Parents/Guardians,

If you are like me, you are closely following the developing situation around the novel coronavirus that causes COVID-19. Please know, student and staff health and safety are the District's top priority.

With that in mind, tomorrow (Tuesday, March 3) every student in the Ridgefield School District will watch an age-appropriate video on proper handwashing technique. Additionally, students will view and discuss a "Stop the Spread of Germs" poster created by the Center for Disease Control. Teachers may also show and discuss an engaging 3-minute video about the novel coronavirus and COVID-19. The links to the hand-washing videos are listed below along with an image of the poster.

Ridgefield School District will continue to closely monitor the situation, take precautions, and follow the recommendations from our local and state health agencies. We will continue to keep you updated.

Sincerely,

Dr. Nathan McCann  
Superintendent
