

WEEK 2
 ONLINE LEARNING TIPS AND STRATEGIES
 Keep Your iPad Running Smoothly
 A little routine maintenance goes a long way!

	<p style="text-align: center;">Clean Your iPad</p> <p>Do not use window cleaner or other cleaning solutions especially those containing ammonia. Instead, use a lint-free, scratch-resistant cloth (like the ones used to clean eye-glasses). Slightly moisten the cloth with water and clean the iPad screen by running the cloth in even strokes across the screen. Keep the case on the iPad and just wipe that down as well.</p>
	<p style="text-align: center;">Reboot the iPad to Clear Memory</p> <p>Be sure to turn off the iPad EVERY DAY! This is the best way to “clean” the inside of the iPad. Powering down the iPad, then turning it back on will clear the memory and give the iPad a fresh start. Reboot the iPad anytime it seems to run slowly or when other odd problems pop up, such as an app that refuses to update. A good practice is to shut the iPad down each night. Just remember to plug it in AND THEN shut it down as plugging it in will turn the iPad back on.</p>
	<p style="text-align: center;">Updates</p> <p>Our iPads are set to do the operating system (iOS) updates automatically. Our IT Director will also monitor app updates and will push those out. Every now and then you will see an app “fade” with the word “waiting” as it updates. As soon as it is done, the app will return to its normal color and will be ready.</p>
	<p style="text-align: center;">Keep it Charged</p> <p>When your child’s iPad is not in use, please be sure it is plugged in and is charging. Zoom will use up a lot of battery during each session. Also, when plugging in and unplugging the cord, be sure your child (or you) grasps the thick part rather than pulling by the cord itself. This is the first part to break if it is always being pulled by the cord. Also, make sure the cord is securely plugged into the wall and the iPad to get a good connection. Close apps and other internet searches so it is not trying to run the apps and the sites. This will also save your battery.</p>
	<p style="text-align: center;">Be On Time For Class</p> <p>One good way to help your child remember their class times is to use the alarm in the iPad. To do this, click on the clock, and go to the alarm. Your child can set the time for each session and select a sound/tone.</p>
