

Alma School District

Academic and Career Planning Plan

Academic and Career Planning in the Alma School District is defined as:

A student-driven journey, which is an adult supported process, which promotes individual growth, potential, and responsibility toward achieving life-long learning. This journey assists the student in reaching their academic, career, and personal goals.

The Alma School District Academic and Career Planning program, also known as ACP, reflects the mission and upholds the values of the district. ACP at Alma will expose all 6th-12th-grade students to experiences, curriculums, and opportunities that will help them shape the next part of their lives. The purpose of ACP is to help prepare students and give them information so they can make informed decisions about their future.

Additional links are provided below, so you can do further research on the ACP process and what it looks like in the Alma School District.
