Smithton School Community:

As stated in a previous letter Tyler Technologies informed schools who use their student information system that they would no longer be supporting SISK12 systems after the 2024-25 school year. The Smithton R-VI School District is a SISK12 system user and has been for a number of years. This news caused us to explore other student information systems and to consider our timeline for transition to a different system.

Although Tyler Technologies partnered with Infinite Campus and adopted them as their preferred student information system, after exploring both Infinite Campus and Lumen Bright Suite the selection team has made the decision to go with Lumen Bright Suite as our new student information system. The selection team felt Lumen Bright Suite provided more options that will encompass all user groups.

We are planning to begin the training and transition process soon. Even though support for SISK12 will exist through the 2024-25 school year, our goal is to be fully engaged with the new system in time for the 2023-24 school year. We are aware of the challenges in moving to a new student information system and the unique training needs that will exist for each user group. Please watch for information regarding training for your group on the new system.

As always, thank you for all that you do and don't hesitate to contact us with any questions or concerns. Have a great day.

Sincerely,

Central Office and Technology Department
Smithton R-VI School District
