Drawing Activity: I'm a Big Helper!

Materials: paper, markers/crayons

- Talk to your child about things he or she does to help around at home. Does he or she put away toys? Take care of a pet? Clear plates from the table after eating? There are so many ways children can help at home!
- After talking with your child about helping at home, give him or her a piece of paper and markers or crayons. Tell your child to draw a picture of what he or she does to help at home. Then ask your child about his or her drawing. You can even write down what he or she says.
- Ask your child how helping at home makes him or her feel. Does it make him or her feel proud? Does it make him or her feel like a big kid? Be sure to congratulate and thank your child for being such a huge help!

Math Activity: How Many Raindrops?

Materials: paper, markers/crayons, cotton balls and glue (optional)

- Start by making clouds. You can have your child glue three or four cotton balls together on a piece of paper to make a cloud. Repeat to make four or more separate clouds. If you don't have cotton balls, help him or her draw clouds.
- Next, write a number above the cloud. If your child is in pre-K, stick to numbers between 1 and 10. If your child is in kindergarten, you can try numbers up to 20. Ask your child what the number is.
- Then, ask your child to make that many raindrops below each cloud. He or she can make raindrops with a marker or fingerprints.
- If you'd like, you can reverse the activity! Have your child make raindrops under the cloud, counting aloud as each is made. Then have your child write the number of raindrops he or she made above each cloud.
