Team Digital is a group of digital learning support specialists developed through a partnership between the Division of Elementary and Secondary Education and Arkansas Education Cooperatives.

We are Arkansas’ Own guiding curators for student-focused change.

We support the planning, implementation and evaluation of digital learning environments in Arkansas. We provide the expertise in emerging online teaching and learning practices that allow for active learning, effective content authoring, personalized lesson design methods, and best practices in helping educators transform system-centered practices into student-focused practices.

Each team member serves 2 cooperative areas.

We are committed to providing operational support to state projects, Arkansas Education Cooperatives and K-12 schools in the growing interest of blended learning and online learning.
