

Every product wearing the Nana Creme label is produced in our own top eight allergen free facility; because we believe that food is only as safe as the environment that it is made in. We check with all of our suppliers to make sure our ingredients are safe from the top eight allergens. We NEVER purchase ingredients produced on shared lines with any of the top eight allergens, or if we think there is any risk for cross contamination in any way. Safe ice creme is our number one priority.
