

Middle School Science - Emergency at Home Learning

Students in your Google Drive is a folder called **E-Learning**. In that folder are lessons and materials for you to complete. Each folder allows for 2 days to complete the work. The overall goal is for you to keep learning as you are away from school.

The basic format:

- Do the Discover Lab if possible (if you have the needed materials).
- Read the section (the books are located in the folders and online)
- Create a Google Doc and take notes on each section. At a minimum add the vocab words.
- Complete the section review questions (ALL) at the end of each section.
- Share the section notes and review questions at the end of the 2 days.
- Some lessons may also include a Teacherease assignment as well.
- USATESTPREP - a group of practice problems will be posted in USATESPPREP. that should be completed at the end of each week.
- A daily check in time will be posted (student email) for you to “check in and learn” with Mr. Olson using Google Meet. This would include a mini lesson, going over notes, go over what needs to get done, and a chance for students to ask questions.

Need help?

- Feel free to email me (molson@rockdale84.org) if you have questions or need help.
