

Meeting Minutes – SHAC

Location: Room 301

Date: 12/11/2019

Time: 4:00

Agenda Items:

1. Member sign in
2. Food Services waiver of Summer Feeding Program
3. Stop the Bleed initiative across campus
4. Presentations JH/HS - Vaping, Juvenile Detention, Digital Footprint
5. Additional Concerns/questions
6. Upcoming meeting dates

Action Items:

1. Approval of previous minutes
2. Vinnie Bass not present, but reported to Staci Vander Schaaf that the Summer Feeding Program waiver was passed by the QISD Board. This has been done the same way for the past several years due to the rural locations of many of our students and the risks of students coming.
3. Stop the Bleed law was passed, so that schools will be more prepared incase of a fatal emergency. We now fulfill the new regulations by having Stop the Bleed kits placed around all 3 campuses, along with AEDs. These were strategically placed to allow access from all different areas of the school, including after school functions. Mrs. Vander Schaaf noted that had talked with other school nurses and our school district was very generous compared to other districts in supplying the kits for our school. There are on average 8 stop the bleed kits in each station. We were also well prepared when it came to training our faculty. All faculty had stop the bleed training in February of 2019. Mrs. Vander Schaaf and several others will/are qualified to teach the course, so that we can get the new staff trained as well.
4. Julie Cole spoke on several presentations that we have had for our students. Those presentations include:
 - a. Vaping presentations was done by a man out of Longview. He created a safe space for 6th - 12th grade students to answer questions and several were surprised on how much the students already knew. He gave the facts on vaping and hopefully it sunk in for the students to make better educated decisions.

- b. Melanie Whitehurst came and spoke to students about juvenile detention. She explained the consequences of drug use and the realities of their punishment.
- c. Maxie Hurst from People's Telephone came and spoke to grades 8-12 about how their actions on the internet are there forever. Employers, college, etc. are doing social media checks this can determine whether you get hired or accepted.

Julie discussed that all these efforts are to help our students make better decisions and know the consequences they will face according to their actions.

5. Additional Concerns and Topics:

- a. Emerson asked about the preparations for the upcoming Flu Season. Mrs. Vander Schaaf noted that she has family that has already experienced school closings where they are due to the flu. Mr. Mason said that he met with Mr. Schoon mid-October discussing preparations and supplies needed. After researching, the best fight against the spread is the sani-wipes. The school will be stocked soon. We also benefit from two shifts of custodial staff that will continue to disinfect after all the students leave each day.
- b. Mr. Mason also mentioned another presentation for possibly mid-February for parents call "Screenagers". This is a presentation presenting on the effects of too much screen time in our youth.

6. Upcoming meeting dates:

- a. 2/19/2020
- b. 5/13/2020
