# NTI DAY 19

#### **Harrison County Schools**

Name: _			
	Grade: _	3rd	
Teache	er:		

Complete within 2 weeks of returning to school.

#### NTI Day 19

Student Checklist: 3rd grade

Complete NTI Day 19 Packet (Reading, Math, and Special)

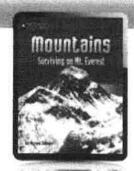

\*\* Exact Path is considered extra practice and **cannot** count as your work for Day 19.

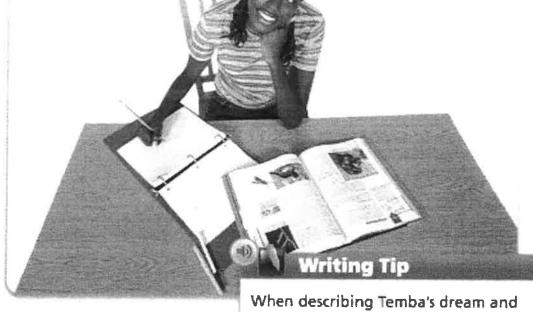

### NTI 19 Reading Directions

- 1. Read page 367 from Journey's page that is provided.
- 2. Write a paragraph on the page provided following the directions given on page 367.
- An example of a paragraph will be provided.

#### WRITE ABOUT READING

Response Think about why Temba wanted to reach the top of Mount Everest. Write a paragraph to describe and explain his dream. Use text evidence from the selection to support your opinions.

Mount Everest, choose strong

vivid picture.

adjectives and adverbs to create a

III.3.1 sak and answer transform to demonshipts undernounding referring to the least III.3.3 are least features and season base to excels ordered orde

**Look Back!** MP.8 Generalize Describe how you used what you know about quadrilaterals to identify the shapes.

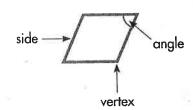

#### How can you describe quadrilaterals?

Remember, a polygon is a closed shape that has only straight sides. A quadrilateral is a polygon with four sides and four angles.

An angle is formed when two sides of a polygon meet.

The point where two sides meet is a vertex.

Some quadrilaterals have special names.

Trapezoid
Exactly one
pair of
parallel sides,
or sides that
never cross

Parallelogram
Two pairs of
parallel sides
Opposite sides are the
same length.

same length.
Opposite angles are the same size.

Rectangle Four right angles, or square corners

A rectangle is a special parallelogram.

Rhombus All sides the same length

A rhombus is a special parallelogram.

Square Four right angles

and all sides the same length

A square is a special parallelogram.

**Convince Me!** MP.1 Make Sense and Persevere Draw a quadrilateral that is an example of one of the shapes listed in Box B. Name the shape. Then draw a quadrilateral this is NOT an example of a shape listed in Box B.

#### **Another Example!**

These are convex polygons. All angles point outward.

These are concave polygons. One or more angles point inward.

### Guided Practice\*

Do You Understand?

#### Do You Know How?

**1.** This figure is a rectangle, but it is **NOT** a square. Why?

or rhombuses.

2. Draw two different quadrilaterals that are not rectangles, squares,

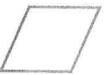

In **3–6**, write as many special names as possible for each quadrilateral.

4.

5.

6.

# ndependent Practice \*

In **7-9**, write as many special names as possible for each quadrilateral.

7.

8

9

In 10, name all the possible quadrilaterals that fit the rule.

**0.** Has 2 pairs of parallel sides \_

### Math Practices and Problem Solving

In 11 and 12, write the name that best describes the quadrilateral. Draw a picture to help.

- 11. Wocabulary A rectangle with all sides the same length is a \_\_\_\_\_.
- 12. Wocabulary A parallelogram with for right angles is a \_\_\_\_\_

- 13. 

  MP. 7 Look for Relationships I am a quadrilateral with opposite sides the same length. Which quadrilaterals could I be?
- 14. Higher Order Thinking Jae says that th figure on the left is a trapezoid. Carmen says that the figure on the right is a trapezoid. Who is correct? Explain.

Some problems have more than one correct answer.

- 15. Sue bought a book for \$12, two maps for \$7 each, and a pack of postcards for \$4. What was Sue's total cost?
- **16. Algebra** Angela drew 9 rhombuses and 6 trapezoids. She wants to find q, the totanumber of angles in her quadrilaterals. Explain how Angela can find q.

No

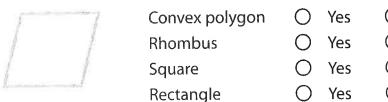

No

No

No

© Common Core Assessment \_\_\_\_\_

**17.** Does the name describe the quadrilateral below? Choose Yes or No.

Solve each problem. Draw a picture in the box to help you. Write your answer on the line.

- 1. Randy had 6 bags. He placed 9 marbles in each bag. How many marbles did he have?
- 2. Taron has 4 stacks of cards with 8 cards in each stack. How many cards does he have?

- 3. Jennifer jumped over 5 rocks. She jumped over each rock 9 times. How many times did she jump?
- 4. Zach runs 6 miles, 5 days a week. How many miles does he run in a week?

- 5. The skaters skated in 7 groups with 4 in each group. How many skaters were present in all of the groups?
- 6. Eight children went for a hike. Each child carried a backpack with 6 bandages in it. How many total bandages did they have?

☐ I can multiply to solve word problems.

### Social Emotional Learning - Diversity 3<sup>rd</sup> Grade

Please complete the following worksheet, <u>Accepting Others</u> as well as the word search.

Directions: In the following situations how can you show that you are accepting?

## ACCEPTING OTHERS

Directions: In the following situations how can you show that you are accepting?

You find out the new student, Jose, is from Mexico. He is very shy and doesn't say much although he speaks some English.  Your friend is going to Special Education for extra help. She is worried that other kids might think she is "dumb."	Everyone is unique and has different gifts or things they are good at. It is important not to judge others because of:
There is a student who doesn't dress very nice and is always left out when the teacher asks students to pick teams.	<ul><li>Looks</li><li>Clothes</li><li>Skin Color</li></ul>
Your friend asks if you want to come over to her house one day. She lives in a low income neighborhood.	<ul><li>Popularity</li><li>Wealth</li><li>Intelligence</li></ul>
Some of your friends are planning a party but you notice they leave out a few people who are not popular.	<ul> <li>Family</li> <li>It is important</li> <li>to see others</li> <li>as individuals</li> <li>and get to</li> </ul>
On Parents Day, you notice a student who has his grandparents there. You find out that he is being raised by his grandparents and never told you.	know them personally.

### HOW MANY KIND WORDS CAN YOU FIND?

Directions: Look in the Word Search to find all the words in the Word Bank.
