### WELCOME TO FOURTH GRADE!

After a relaxing summer, we will be off to a great year of learning and adventure. We will be studying many interesting subjects such as electricity, geometry, and New York State's history. The class will be working on research and science labs as well as many reading, writing, math and problem solving activities.

During the summer, there are several ways to prepare for fourth grade. While traveling in New York State, write down the names of cities, towns, rivers or lakes you come across. Save pamphlets from the various historic or scenic sites you visit and bring these mementos with you to school in the fall. Be sure to find a shady spot in which you can enjoy a few chapter books. Keep a list of the materials you read. Write some stories, letters, and poems, or keep a journal of your summer activities. Practice your cursive handwriting. Spend some time each week reviewing your addition, subtraction, and multiplication facts. If you have a computer to use, try some of the activities on the school web site.

**We are looking forward to seeing you in September.**

14. Pack of thin dry erase markers

\*You will be given one school agenda book.

#### Summer Assignments:

- **READING:** Please read at least one book from the attached list over the vacation. Be prepared to complete a short book report in September.
- **MATH:** Practice your multiplication facts. Flash cards are always a big help! We also ask that in order to keep your decimal and fraction computation skills fluent, you take time to practice addition, subtraction, multiplication, and division of decimals and fractions over the summer. You can visit <http://www.ixl.com/math/grade-6> that offers skill practice in ELA and Math.

We look forward to seeing you in the fall. Enjoy your vacation!

Yours truly,  
The Sixth Grade Team
