FUN, HANDS-ON ACTIVITIES TO KEEP KIDS ENGAGED

PAPER ART

Pointillism is a style of painting made up of tiny dots of color. This technique was developed and made famous by George Seurat and Paul Signac in France in the late 1880's.

Pointillism Project

Supplies Needed: Paper, Pencil and Markers

Instructions:

1. With pencil lightly draw a simple picture. A tree or flower works well
2. Select colors for your picture.
3. Start filling in your picture with little dots of color.

Explore More

Try blending colors with your markers, put equal amounts of one color dot with equal amounts of another color dot.

Exchange markers for paint and use cotton swabs or a pencil eraser to make your dots of color.

Origami

Origami is the art of folding paper. The goal is to transform a flat, square piece of paper into a 3 dimensional sculpture.

Paper Puppy

Supplies Needed: Marker, crayon or Pencil and a square piece of paper Any type of paper will work but it needs to be square. (Regular paper makes a 8.5 inch square, construction paper makes a 9 inch square.)

1

Place square of paper in front of you as a diamond

2

Bring bottom corner to the top corner & fold

3

Bring right corner to the left corner & fold

4

Unfold and place in front of you

5

About an inch from the center fold, fold right corner down

6

Repeat Step 5 on the left

7

Fold bottom corner up about 1 1/2 inches

8

Draw on eyes, nose and other details

TIP - a small piece of tape to help hold the nose
