

South Gibson County High School Scholars' Prep Guide 2019-2020

Course: Agriculture Science

Curriculum for the upcoming course and information of which students should be aware:

Agriscience is an introductory laboratory science course that prepares students for biology, subsequent science and agriculture courses, and postsecondary study. This course helps students understand the important role that agricultural science and technology plays in the twenty-first century. In addition, it serves as the first course for all programs of study in the Agriculture, Food, & Natural Resources cluster. Upon completion of this course, proficient students will be prepared for success in more advanced agriculture and science coursework. This course counts as a lab science credit toward graduation.

Areas that might be challenging for students:

This course covers principles of history of the agriculture industry (animals, plants, soil, business, marketing, mechanics, and FFA,) chemistry, physical science, environmental science, earth science, and technology.

Suggestions on how students can prepare for the upcoming course:

Review material learned in middle school science.
