

South Gibson County High School Scholars' Prep Guide 2019-2020

Course: **Entrepreneurship**

Curriculum for the upcoming course and information of which students should be aware:

Entrepreneurship is a course designed to help students decide if they want to start their own business. Students throughout the semester will cover the basics of being able to start their own business and the details that go in to creating business from scratch. Students will cover all aspects of the business as well as the creative process of making it what they want.

Areas that might be challenging for students:

Students tend to struggle with the creativity of making a business that has never been done before. In this course I ask students to create a product that has never been invented and see if they can start a business from it. This challenges the students not only in their creativity, but also in their ability to research the information needed to start a business.

Suggestions on how students can prepare for the upcoming course:

Students can prepare by studying some people who started their own business and made it a success. This will help students to understand some of the struggles that may come up in starting a business. Not all businesses will succeed at first and research and studying people who have done this will help them realize it takes creativity and perseverance.

Suggested activities or resources (if applicable):
