

# South Gibson County High School Scholars' Prep Guide 2019-2020

Course: Greenhouse Management

Curriculum for the upcoming course and information of which students should be aware:

Greenhouse Management is an applied-knowledge course designed to prepare students to manage greenhouse operations. This course covers principles of greenhouse structures, plant health and growth, growing media, greenhouse crop selection and propagation, and management techniques. Upon completion of this course, proficient students will be equipped with the technical knowledge Page 2 and skills needed to prepare for further education and careers in horticulture production. Greenhouse Management is a dual credit course with statewide articulation.

Areas that might be challenging for students:

Business principles, marketing, and plant processes

Suggestions on how students can prepare for the upcoming course:

Review material learned in agriscience and plant and soil science.
