

VT 4500 – AUTO COLLISION REPAIR I
VT 4510 – AUTO COLLISION REPAIR II

Auto Collision Repair is a two-year program designed for students who have the desire to work in the auto body industry. Students will experience structural analysis and repair, painting and refinishing, plastic repair, and some light mechanical repair. Theory as well as hands-on training will be covered. Safe work habits, as well as environmental issues will be addressed. Students will meet entry-level job standards, as well as prepare to further their education at a technical college.

Essential Learning Objectives

Students will demonstrate the use of hand and pneumatic tools and follow strict enforcement on safety precautions to complete the following:

- Vehicle preparation
- Scratch repair
- Dent repair
- Priming
- Painting
- Specialty Painting

- Students will learn/use Technical Mathematics Skills
- Students will learn/use Technical Communication Arts Skills
