

My name is Gael Nuno and I am the Valedictorian for the Crane High School Class of 2022. I was born in Guadalajara, Mexico and moved to Crane when I was 3 years old. Ever since, I have attended school at Crane. My parents are Ricardo Nuno and Norma Navarro and my siblings are Axel and Camilah Nuno. Throughout my entire education so far, I have always excelled particularly in the areas of science and mathematics. I consider myself a great problem solver who often challenges myself to go past my limits. These problem-solving skills will put themselves to the test when I attend the University of Texas at Austin majoring in aerospace engineering next fall. My strong interest in science has led to my participation in UIL STEM events such as science, mathematics, and computer science. Over the past four years at Crane High School, I have earned many notable awards and positions such as President of the National Honor Society, State UIL Science competitor, and many first place UIL Science positions within district and regional meets. In my free time, I enjoy playing video games, creating origami, reading, and using my telescope to observe the night sky. My future goals include landing a job as an astronautical engineer for an administration such as NASA or SpaceX.
