

At Clarendon School District we use the evidence-based Susan Barton Reading and Spelling program for Dyslexia interventions. We used this program during the 2019 – 2020 school year at both campuses.

During the 2019 – 2020 school year students attending the Clarendon School District received interventions from a trained dyslexia interventionist.

For the 2020-2021 school year the Susan Barton Program will continue to be used and a trained interventionist will deliver the instruction to students in this program.

During the 2020 – 2021 School Year Clarendon School District has 16 students that were identified as exhibiting the characteristics or markers of dyslexia.
