

MILAN C-2 SCHOOL DISTRICT
BETTER MC2 – PROJECT 2020 ----- FEBRUARY 2020 – UPDATE

FEBRUARY 6TH, 2020

The late January snow provided some unique conditions for the contractors; but the progress is still moving along. The metal/steel columns will likely be installed in the coming weeks and could be done prior to the flatwork of the foundation floor being completed.

This is a ground level picture of the beams/trusses and other items related to the pre-engineered metal building for the NEW GYMNASIUM. The infrastructure of the gym is an iron/steel/metal and will have masonry brick exterior up to nearly 14 feet; with the metal exterior finishing the remainder of the exterior.

This is an overhead view of the south-side of the new structure-primarily where the KITCHEN will be located.

This is a ground-level picture facing south from the northeast corner of the gym area.

MILAN C-2 SCHOOL DISTRICT
BETTER MC2 – PROJECT 2020 ----- FEBRUARY 2020 – UPDATE

This is a viewpoint facing to the north – specifically the NEW GYM. The dump truck is placed on the far northeast corner of the gym structure.

Another overhead view point – this is the south side of the kitchen and clearly shows the new drain area.

This ground-level viewpoint is the southeast corner of the new structure – near the NEW KITCHEN area.

The plans for the renovated LIBRARY-MEDIA CENTER is currently underway and will be shared in the upcoming weeks – *specifically Technology areas, Individual work areas, etc.*

Progress is POWERFUL! It is truly EXCITING!
