

Parent Information

3/10/2020

We have been closely monitoring concerns surrounding COVID-19. First and most importantly, we will do our very best to provide a quality learning environment for our students and staff. With this in mind, we value every day with our students and the opportunities we have each day to help them learn. Thus, it is our position that we will continue to operate as normal unless told to do otherwise by a qualified authority. (Health Department, Governor decree, etc.)

Today, district leadership met to begin a planning process in the event we are directed to close. It is our goal to *deliver education without having students on campus if needed*. This may require some personnel to receive training. We will begin working toward this goal immediately. Our main focus is to continue teaching classroom benchmarks without the face-to-face interactions. This will not be the “Blizzard Bag” of old.

If these measures become necessary, we will need your support and cooperation in working with your children each day to spend the time necessary to continue meeting classroom goals..

I request your patience and cooperation as we put these concepts into place. We know that we will not have all the answers today, but beginning these discussions allows us to prepare with a purpose.

Go Tribe!!
