Indiana 2020-2021 Required and Recommended School Immunizations

Grade	Required	Recommended	
Pre-K	3 Hepatitis B 4 DTaP (Diphtheria, Tetanus & Pertussis) 3 Polio	1 Varicella (Chickenpox) 1 MMR (Measles, Mumps & Rubella) 2 Hepatitis A	Annual influenza
K-5th grade	3 Hepatitis B 5 DTaP 4 Polio	2 Varicella 2 MMR 2 Hepatitis A	Annual influenza
6th-11th grade	3 Hepatitis B 5 DTaP 4 Polio 2 Varicella	2 MMR 2 Hepatitis A 1 MCV4 (Meningococcal) 1 Tdap (Tetanus, Diphtheria & Pertussis)	Annual influenza 2/3 HPV (Human papillomavirus)
12th grade	3 Hepatitis B 5 DTaP 4 Polio 2 Varicella	2 MMR 2 Hepatitis A 2 MCV4 1 Tdap	Annual influenza 2/3 HPV 2 MenB (Meningococcal)

Who should get the HPV vaccine? All girls and boys who are age 9 to 26 years old should get the recommended series of HPV vaccine. **HPV is on the rise and Indiana ranks last in getting kids vaccinated.**

Why is the vaccine recommended at such a young age? HPV vaccine produces a higher immune response in preteens than it does in older teens and young women.

Serogroup B Meningococcal Vaccine (age 16 to 23 years old) should be vaccinated with a serogroup B meningococcal vaccine (Bexsero®) preferably at age 16 to 18 years old. It is a two-dose series. Meningococcal disease can spread from person to person through close contact (coughing or kissing) or lengthy contact, especially among people living in the same household. Even when it is treated, meningococcal disease kills 10 to 15 infected people out of 100. And of those who survive, about 10 to 20 out of every 100 will suffer disabilities such as hearing loss, brain damage, amputations, nervous system problems, or severe scars from skin grafts. **This is being required for all incoming freshman for college.**
